

Virginia Career VIEW presents: 2013 FISHING APPs!

Apps are part of everyday. But how are they developed?

Here is a look into the process:

Development TEAM

A programmer turns the English language into programmer language. Other apps require a designer, Testers, and online freelancing services. You can post a project and receive bids from resources.

Kids Making Apps:

Take a look at Kids around the world building their own apps!

- **Ebony Samantha- Age 16 "Lomo Ho" App-** A photography app that applies colorful filters to photos for .99
- **Thomas Suarez- Age 12 "Earth Fortune"** Displays the Earth in different colors
- **Robert Nay- Age 14 "Bubble Ball"** A physics puzzle game-free
- **Connor Brendish-Age 18 "iSpoke Flash Cards"** create your own flash cards, store them, and record your voice, used as an educational tool for children with special needs, such as autism. \$4.49 (50 cents of each sale is donated to Autism Spectrum Australia)

Mobile Apps *Keep fishermen Safe!*

We all know that old sea dogs only reveal their secret fishing spots under threat of death. The problem is that over 20 of them are drowning each year in boating incidents (up 150% on the five year average) largely because no one can locate them when they get into trouble on the water

No one knows this better than the people who supply the majority of New Zealand's boaties with lifejackets - the team at Hutchwilco - so they've decided to do something about it by generating a mobile app that makes sure they don't lose any more customers.

Hutchwilco Managing Director Gary Sutton says, "We understand why Kiwi fishermen don't want to reveal their secret fishing spots but are they really worth dying for? It seems such a tragedy when responsible boaties invest in good quality lifejackets and then risk their safety by not telling loved ones where they are going.

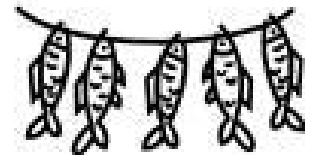

"Our invaluable new app has been under development for 18 months and we think it will catch on with Kiwi fishermen - hook, line and sinker!"

The secure app dubbed 'Hutchwilco's secret fishing spots' can be downloaded free from itunes. It allows fishermen to map their favorite fishing spots as well as keeping a log of their catch. Once you log on it will record your journey and allow loved ones at home to know exactly where you are if the need arises.

If initial reaction is anything to go by, this app really resonates with responsible boaties. After just one week it is already ranking at the #2 sports app on itunes.

Other Apps

All about the Fishing

SAS Survival Guide

The SAS Survival Guide is a must-have survival and safety guide written by a former Special Air Service (SAS) soldier. It provides vital information on safety and survival, a photo gallery that with detailed descriptions of anything from deadly mushrooms to poisonous plants, a survival checklist, key information supported with illustrations, a Morse code signaling device, a compass and more. Featuring video and images, this device will make sure you get the answers you're looking for when you need them most.

iSonular Hunting & Fishing Times:

The iSonular Hunting and Fishing App gives hunters and anglers up-to-date details regarding the best time of day for hunting and fishing anywhere in the world. Using astronomical data from the US Naval observatory, users get access to location specific information on feeding/activity periods, sunrises and sunsets.

GoldenPic

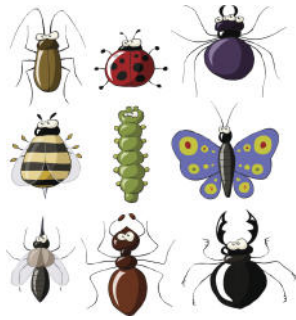

The GoldenPic app was initially designed as a photography app but has since extended its utility to hikers, campers, hunters, anglers and even pilots. This app provides sunrise and sunset times as well as lunar phases. The special thing about this app is that it also tells you when the Golden Hours and Blue Hours are. The Golden Hour is the first and last hour of sunlight during the day. The Blue Hour is the period of twilight each morning and evening where there is neither full daylight nor complete darkness. These are considered the ideal times for getting the best shots.

With GoldenPic you can also save locations, and of course share your pics on Facebook, Twitter and Tumblr.

Bug Spray

We all know how pesky those bugs can get and if at some point you run out of bug repellent, you can use the Bug Spray app to emit high frequency tones that will keep the bugs away. The ultrasonic app releases tones at frequencies above the hearing range of most people- but keep in mind that won't be the case for animals.

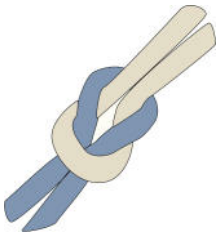

North American Fish Guide

This is a great reference guide for those fishing in the U.S. or Canada. It includes detailed descriptions and illustrations for over 100 of the most common freshwater fish. This is definitely the tool you need for identifying the fish you catch. Available for Android only (\$0.99).

Animated Fishing Knots

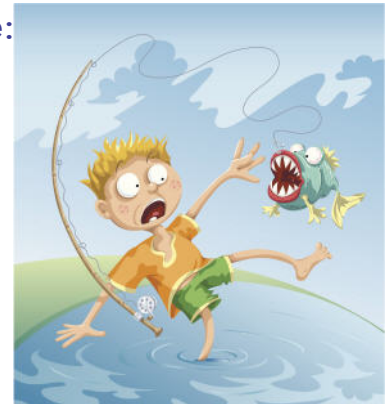

If you're an angler, you need to know how to tie different knots. This app has got you covered with 21 fishing knots complete with animation, video, and pictures of the finished knots as well as descriptions and how to use them. The app lists these fishing knots alphabetically and you can search by name, category, and use.

Fishin' Buddy Lite:

Keep a fishing diary right on your phone. Record location, time, weather, species, lure, and other information. You can review past fishing trips and events to guess when and where you might be successful on future trips. You may also want to save your data so that you can brag to your friends on Monday morning with the stats to prove it. Available for Android. (Free)
